

3. Mapathon in Berlin!

Geographie FU-Berlin

Wednesday, June 3rd
4 pm
Geo-Campus der FU Berlin
House G Room G108

What's that all about?

We are mapping regions which are effected by catastrophies. These maps are **requested by humanitarian organisations**. Therefor we will use OSM (OpenStreetMap), the largest user-generated map in the world.

You don't need to be used to OSM! We begin with a little introduction in OSM-mapping. But the programmes are very intuitive.

After that we will map till we got stiff bloody fingers.

There will be sweets and drinks ;)
